Re-classification of
Class V Disposal Projects
Kern River Field
Santa Margarita/Vedder Zone

Documentation?

Dear Mr. Zwakenberg:

As of August 10, 1987 the EPA has approved the injection of air scrubber waste and water softener regeneration brine that is associated with oil-field operations into Class II wells.

The Division of Oil and Gas has now re-classified all the Class V projects, that meet the above description, to Class II projects.

If you have any questions, please contact Reed Bowles or Randall Adams.

Yours truly,

Reed J. Bowles
Associate Oil and Gas Engineer
